LIVE DEMO · 2026

The AI-native school, in one login.

A walkthrough prepared for **[School Name]**.

aivenx.co.in · hello@aivenx.co.in

Mumbai, India

WHAT WE'LL COVER

A guided tour, feature by feature.

01 The problem we solve

02 Admissions & enquiry

03 Fees & invoicing

04 HR & payroll

05 Timetable & exams

06 Report cards (multi-board)

07 Cortex — Chapter Generator

08 Cortex — Question Bank (150k)

09 Cortex — Assessment Creator

10 Cortex — AI Evaluator

11 Cortex Helper + Study mode

12 Face AI attendance (live)

13 Parent communication

14 Library · Transport · Hostel

15 Security & data

16 Editions, onboarding, next steps

THE PROBLEM

Schools juggle 5 vendors.

Each charges per-module, has its own login, its own data silo, its own outage window. AlvenX replaces all five with one platform.

VENDOR 1	VENDOR 2	VENDOR 3	VENDOR 4	VENDOR 5
ERP	**LMS**	**Biometric**	**Exams**	**Transport**

SECTION 1 OF 4

School Operations.

Admissions · Fees · HR · Library · Transport · Hostel.

FEATURE 01 · ADMISSIONS

Capture every enquiry. Convert more of them.

A full enquiry-to-enrolment funnel. Every walk-in, web form, and phone call lands in one queue with follow-up reminders.

What it does

- Online enquiry form embedded on your school website
- Walk-in capture by the front desk in 30 seconds
- Stage-tracked pipeline: Enquired → Visited → Tested → Offered → Enrolled
- Auto-reminders for follow-up calls, missed steps
- Document uploads (birth cert, previous report card, photo) — all in one record
- Direct conversion to a student record on enrolment — no re-typing

WHY IT MATTERS

Most schools lose 30% of enquiries between the form and the first follow-up call. AIvenX prevents that by making every enquiry visible to admin, principal, and the front desk on day one.

Drag-drop pipeline **SMS / email templates** **Conversion analytics**

FEATURE 02 · FEES & INVOICING

Every rupee, accounted.

Term-based fee structures, online payments, automated dues reminders, and a finance dashboard the principal can read in 10 seconds.

Flexible structures

Term · Monthly · Annual. Sibling discounts, scholarship rules, late-payment penalties — all configurable.

Online payments

UPI, cards, netbanking. Payment links over WhatsApp. Auto-reconciled — no manual tallying.

Auto reminders

Dues SMS / email at T-7, T-3, T-0 days. Custom templates. Principal can pause for individual cases.

Receipts & invoices

GST-compliant. Branded with your school's logo and signature. Bulk-export for the auditor.

Finance dashboard

Collected vs. outstanding by class, term, fee head. Drill-down to the student in two clicks.

Refunds & adjustments

Audit-logged. Approval workflow keeps the principal in the loop on every reversal.

FEATURE 03 · HR & PAYROLL

Staff records, salaries, and statutory — in one tab.

From the day a teacher joins to the day they retire — appointment letters, leave, payroll, PF, ESI, TDS.

Staff lifecycle

- Onboarding: appointment letter, ID card, document checklist
- Attendance: face-AI for staff too
- Leave types: CL · SL · PL · maternity · LOP — with workflow approvals
- Performance reviews: end-of-term, principal-driven
- Exit: relieving letter, full-and-final settlement, archive

Payroll & statutory

- Salary structures: basic, HRA, allowances, deductions
- PF + ESI auto-calculated; challans generated
- TDS: monthly deduction, Form 16 at year-end
- Bank-ready salary file in one click
- Payslips emailed; staff can download anytime from their portal

FEATURE 04 · TIMETABLE & EXAMS

Build a clash-free timetable in 20 minutes.

Auto-generation respects teacher availability, lab capacity, and subject hours. Exam scheduling and seating plans included.

Auto-generation

Set constraints once: teacher loads, room types, free-period rules. AIvenX builds the grid — no clashes.

Substitutions

Mark a teacher absent → system suggests a substitute from free periods → SMS to substitute & class.

Exam schedules

Term + final + unit tests. Auto-checks against syllabus completion. Hall-ticket generation.

Seating plans

Mixed-class seating with one click. Roll-number rules, distance constraints, supervisor assignments.

Marks entry

Teacher portal with bulk-paste from spreadsheets, validation, and lock-after-submission.

Result analytics

Class average, pass %, top scorers, weak areas — per subject, per chapter.

FEATURE 05 · REPORT CARDS (MULTI-BOARD)

Native formats for every board.

Not a one-size-fits-all template. Each board's official structure, grading scale, and skill rubric — out of the box.

International

- **IB PYP** — inquiry-based learning rubric
- **IB MYP** — criterion grades A–E across 4 strands
- **IB DP** — 1–7 + TOK / EE / CAS
- **Cambridge IGCSE / A-Levels** — A* to G
- **Advanced Placement** — AP score, course grade

Indian

- **CBSE** — Term + final, scholastic + co-scholastic, CCE
- **ICSE / ISC** — Marks-based, ICSE skill grading
- **State Boards** — Maharashtra, Karnataka, TN, UP, etc.
- **NIOS** — Distance / open schooling

Don't see yours? Cortex AI is built to adapt to any framework — share your school's rubric and we'll configure it during onboarding.

SECTION 2 OF 4

Cortex AI Studio.

The flagship. Five tools that save every teacher 10 hours a week.

FEATURE 06 · CHAPTER GENERATOR

A board-aligned chapter, in 30 seconds.

Pick subject, grade, topic. Cortex produces a full chapter — text, diagrams, exercises, answer keys — written in one of four learning modes.

🎯

Focus

Clear, structured, exam-ready. Definitions → examples → practice.

⚡

Spark

Engaging analogies, real-world hooks, "why does this matter" framing.

🎮

Quest

Gamified — challenges, streaks, levels. Best for grades 4-8.

📖

Saga

Narrative-driven. Concepts taught through story arcs and characters.

WHAT'S INCLUDED IN EVERY CHAPTER

Body text · Embedded diagrams · Worked examples · End-of-chapter exercises · Answer keys · Glossary · Cross-links to prior chapters.

TEACHER REVIEW WORKFLOW

Generate → review → edit any line → publish to class. Versioned. Re-generation preserves your edits.

FEATURE 07 · QUESTION BANK

150,000+ pre-loaded questions.

Curated, tagged, and board-mapped. The library that took us 18 months to build is yours from day one.

Every type

MCQ · Fill-in-the-blank · Short answer · Long answer · Match · True/False · Diagram-based · Numerical.

Tagged deeply

Subject · Grade · Chapter · Difficulty (1-5) · Bloom's level · Marks · Time estimate.

Board-mapped

Each question linked to CBSE / ICSE / IB / CAIE / State Board syllabus codes for guaranteed alignment.

Past-paper rooted

Includes 10 years of board exam questions, marked, with model answers.

Add your own

Teachers contribute private questions to a school-only pool. Stays inside your tenant.

Continuously updated

New questions every month. Existing ones re-rated when student data shows mis-calibration.

FEATURE 08 · ASSESSMENT CREATOR

Build a 3-hour board-style paper in 4 minutes.

Pick filters → preview coverage → publish. CBSE-standard section presets included.
Live distribution chart shows you exactly what students will face.

How it works

1. Pick subject, grade, total marks, duration.

2. Choose section structure — or load a preset (CBSE Sec A/B/C/D/E).

3. Per section, set: question type, count, marks each, chapter & difficulty filters.

4. Live preview shows: chapter coverage %, Bloom distribution, expected difficulty curve.

5. Auto-fill from question bank, or hand-pick. Mix freely.

6. Publish → printable PDF + answer key + student-portal link.

WHY TEACHERS LOVE IT

Paper-setting used to take 4-6 hours. With Cortex it's under 10 minutes — and the coverage preview catches mistakes before they reach students. Two teachers can collaborate live on the same paper.

- CBSE preset built-in
- Live coverage chart
- Two-click duplicate

FEATURE 09 · AI EVALUATOR

Grade 200 answer sheets in an hour, not a weekend.

Upload scanned sheets — Cortex grades MCQs in seconds and short / long answers using rubric-aware AI. Borderline cases route to the teacher for review.

OCR for handwriting

Trained on Indian student handwriting. Works on regular A4 scans — no special paper.

Rubric-aware grading

Compares to model answer + rubric. Awards partial marks; explains every deduction.

Teacher-in-the-loop

Confidence-scored. Borderline answers (~10%) are routed to the teacher; rest are auto-finalised.

Plagiarism check

Flags suspiciously similar answers across the same class — catches copying.

Auto-write to gradebook

Marks land in the exam record. Report cards generate themselves.

Insights for teachers

Per-question analytics: which concept needs re-teaching, which student needs help.

FEATURE 10 · CORTEX HELPER + STUDY MODE

An AI guide on every page. Meet Leo.

A floating chat button that knows what page you're on. For staff, it's product help. For students, it's a chapter tutor.

Helper mode (staff)

- "How do I generate a fee invoice?"
- "Why is this student showing absent?"
- "Take me to the timetable for Class 7B"
- Streams answers live · cites the right module
- Persists across pages — context carries

Study mode (students)

- Auto-activates on chapter pages
- "Explain photosynthesis like I'm in grade 7"
- "Quiz me on this chapter"
- "What did this paragraph mean?"
- Stays on-syllabus — never goes off-topic

Privacy: Student conversations never train external models. School data stays inside your tenant.

SECTION 3 OF 4

Face AI Attendance.

The biometric machine, replaced by a webcam.

FEATURE 11 · FACE AI ATTENDANCE

Under a second per student. No queue.

Live demo follows. A single webcam at the door marks every student present in real time, while teachers walk in and start teaching.

1

Enrol once

3-5 photos at admission. Embeddings stored, photos discarded.

2

Recognise live

Camera streams to the AIvenX recognizer. Faces matched in <1 sec.

3

Default-absent

Anyone not seen by cut-off → marked absent → SMS to parent.

4

Period-wise

Re-runs every period. Catches mid-day absconding too.

Privacy by design: only mathematical embeddings are stored — never raw photos. Local ID-card scanning continues to work as a backup. Camera frames are processed and discarded.

SECTION 4 OF 4

Engagement & Operations.

Communication · Library · Transport · Hostel · Foundations.

FEATURE 12 · PARENT COMMUNICATION

One channel for every parent message.

Notice board, SMS, email, in-app, and (optionally) WhatsApp Business. Every message logged, every delivery tracked.

Notice board

School-wide, class-wise, or individual. Pin-to-top, expiry dates, attachments supported.

Templates

Pre-built for: absent SMS, fee dues, exam reminders, parent-teacher meetings, holidays.

Multi-language

English, Hindi, Marathi, Tamil, Bengali — one message, auto-translated per parent's preference.

Two-way

Parents reply from their portal. Teacher sees a threaded conversation, never lost in WhatsApp.

Event calendar

Sync to Google Calendar / Apple Calendar. PTM bookings handled in-portal.

Delivery tracking

Sent · Delivered · Read · Replied. Auditable, exportable.

FEATURE 13 · LIBRARY · TRANSPORT · HOSTEL

The operational long tail, handled.

Three modules that other ERPs charge extra for — included in AlvenX from the Operate edition onwards.

Library

- Catalogue with ISBN auto-fetch
- Issue / return via barcode or QR
- Fines auto-calculated, charged to fees
- Reading lists per class
- Inventory audits, reservations

Transport

- Routes & stops with student assignment
- Driver app for pickup confirmation
- Live GPS (with hardware partner)
- Parent ETA + boarding/alighting alerts
- Bus fees integrated with fee module

Hostel

- Room allocation, roommate matching
- In/out register with face check-in
- Mess attendance & menu
- Visitor log, leave applications
- Hostel fees + mess charges integrated

FEATURE 14 · SECURITY & DATA

Built for the data you can't lose.

Schools handle some of the most sensitive personal data anywhere — minors' photos, medical records, fee histories. AlvenX is engineered around that responsibility.

Multi-tenant secure

Each school is fully isolated at the database level. No cross-tenant leakage, ever.

Role-based access

Admin · Principal · Teacher · Student · Parent — every action audited.

Daily backups

Encrypted, point-in-time recovery. One-click data export — no lock-in.

IN

Hosted in India

Data residency, low latency, DPDP-aligned for Indian schools.

Privacy-first AI

Face embeddings only. Student data never trains third-party models.

Audit logs

Every login, edit, and export logged for compliance and forensics.

EDITIONS

Pick the edition that fits your school.

STARTER

Operate

- ✓ Admissions & fees
- ✓ HR & payroll
- ✓ Timetable & exams
- ✓ Report cards
- ✓ Library · Transport · Hostel
- ✓ Parent portal

MOST POPULAR

- ✓ Student Surveillance (2026)
- ✓ Dedicated CSM

Pricing scales with student count. We'll send a tailored quote within 48 hours of this demo.

ONBOARDING

From contract to live in 14 days.

DAY 1-3

Setup

Tenant provisioned. Branding, classes, sections, fee structure imported.

DAY 4-7

Data migration

Student & staff records imported from your existing system. Validated by AlvenX team.

DAY 8-11

Training

Admin · Principal · Teacher · Parent walkthroughs. Recorded, role-specific.

DAY 12-14

Go-live

Soft launch with one class → full rollout. Dedicated CSM on call.

White-glove migration is included. We handle CSV imports from your current ERP / LMS — your team isn't stuck reformatting spreadsheets.

NEXT STEPS

Three things, this week.

01 **Tailored quote**
Pricing for your edition + student count within 48 hours.

02 **Pilot setup**
Free 14-day pilot tenant with one class — your data, your branding.

03 **Decision call**
Reconvene at the end of the pilot to plan rollout or close out.

Thank you.
